

June 6, 2017

Dear Montgomery Resident:

I am pleased to report that the public street in front of your home will have a new asphalt road surface installed as part of the 2017 City of Montgomery Street Resurfacing Program. Montgomery City Council authorized City Manager Wayne Davis to enter into a contract with John R. Jurgensen Company to complete this project.

Selective curb removal and replacement work is scheduled to begin on the five (5) streets included in this year's program in June. Construction updates will be posted on the City's website, www.montgomeryohio.org once work begins. You can also receive construction updates by following us on Twitter or by becoming a Facebook fan by signing on through the City's website.

As curb and catchbasin work involves excavation in the public right-of-way, please advise City of Montgomery Inspector Jesse Bundy of buried installations such as underground irrigation systems or underground dog "fences" or containment systems you may have along your property frontage.

Please also let Jesse know if you have events or parties scheduled at your home during July and August so we can try to work around those important activities you have scheduled.

This project may result in minor travel delays during construction. If access into your driveway will be blocked due to construction for any reason you will be notified by the contractor at least 48 hours in advance of the work. With work scheduled for (5) streets located in various areas of our community, you may observe times of no construction activity while other days you may see extensive construction on your street or in your neighborhood.

Here are phone numbers that you may call if you have questions during construction:

John R. Jurgensen Company	771-0820
Patrick Lewis, John R. Jurgensen Company	326-6784
City of Montgomery Project Inspector – Mr. Jesse Bundy	792-8356
Assistant Public Works Director – Mr. Gary Heitkamp	792-8321

If you require additional information please do not hesitate to contact me at 792-8319.

Sincerely,

Brian Riblet
Public Works Director

c Wayne Davis, City Manager
Jesse Bundy, Project Inspector
Gary Heitkamp, Assistant Public Works Director
